

## Being Literate Now Enabling Tomorrows

This course is aimed at those in the ROV industry who are not yet **COMPETENT** in High Voltage and their relationship with ROV Operations

High-voltage work is inherently hazardous.

Any team working with a range of marine high voltage systems must be on guard against incidents.

A full understanding of safe procedures is essential.

GET COMPETENT AND LEARN  
FROM INDUSTERT EXPERTS

---

A Suitable course candidates will have some technical expertise and knowledge of ROV system, any level skill can still benefit from the course.

## Course Modules

- ✓ Safety with High Voltage
- ✓ System Components
- ✓ Risk & Injury
- ✓ Safe Systems of Work
- ✓ Hazardous Areas

Electrical & Electronic  
Workshop

Mechanical  
Workshop
