# OUR SERVICES

## Remotely Operated Vehicles Entry Level Course

Practical ROV training are developed on simulators and workshop the best assessment following the IMCA guidelines and the industry requirements performing real operations found in the Offshore Marine industry.

Our trainees receive a thorough ROV Pilot education along all over the course, which includes a professional development module program with experts from across the marine industry to enhance your understanding, achieve and develop the professional skills required for a successful career as a commercial ROV Pilot.

Developed on simulators and workshop

## Supplementary Courses

Best-practice training has been delivered to personnel in oil & gas, subsea, marine and maritime, and associated sectors for over a decade.

Our courses focus on incorporating practical methods with beneficial procedures so that your employees have a competitive edge.

- Electrical, Electronics and Hydraulics Introductory.
- High Voltage and Safety Practice for ROV Pilot Technicians.

## Competencies Certification

For the highly competitive maritime, offshore survey and oil & gas industries, gaining industry-recognized certification confirming your competence goes a long way in proving your advantage.

Whether you're a company looking for new business contracts or seeking full-time employment or work as a freelance contractor, credibility in these industries can come from having internationally certified members of your team.

Our certification is impartial and independent, as well as being a globally recognized mark of quality across ROV.
